I turn manual business reporting into live software.

Odoo ERP and supply-chain analytics, encrypted mobile platforms and applied AI. Twenty-plus live dashboards on a factory floor, an end-to-end encrypted messenger, and assistants that answer from a database rather than a guess.

01 / IMPACT, MEASURED IN PRODUCTION

20+
live Odoo dashboards

40%
fewer material shortages

1,430
tests; coverage 51% → 74%

400+
production bugs fixed

02 / WHAT I AM HIRED FOR

Odoo ERP development & dashboards

Custom modules, OWL boards and the planning logic underneath — the thing that replaces the spreadsheet nobody trusts.

AI integration & LLM features

Retrieval over your own data, tool-calling with a deliberate blast radius, business rules in code rather than in a prompt.

React Native & web apps

Production mobile apps and dense admin dashboards — React, Next.js, Capacitor, shipped to both stores.

Data pipelines & report automation

Python on GitHub Actions into Looker Studio, Sheets and Power BI. The report updates itself.

Backend & API development

NestJS and Node over PostgreSQL or MongoDB, organised so a feature can be handed to one person.

Real-time, encrypted & e-commerce

WebRTC group calling, Signal Protocol E2EE, Magento and Stripe with one source of truth for every price.

03 / SELECTED WORK

Bravo Secure — OmniDevX Studio — SIGNAL · WEBRTC · RN
Encrypted messenger and booking platform for security personnel.

Odoo 17 dashboard suite — Tex Fasteners — PYTHON · OWL · PG
Twenty-plus live boards that replaced a factory's spreadsheet reporting.

Exzellent — learning platform, Cottbus — REACT · NODE · CAPACITOR
Courses, AI tutors and speech practice; web and both app stores from one codebase.

Freight assistant — MKY Global Forwarding — NODE · PG · LLM
Telegram, WhatsApp and web. The model may read; it may not decide.

GuardMaster Fencing — OmniDevX Studio — ASTRO · MAGENTO 2
US high-security fencing storefront with a full-matrix configurator.
