PROJECTS

Bravo Secure – Encrypted Booking Platform and Team Messenger (OmniDevX Studio)

- Secure booking platform and Slack-style team messenger for security personnel, built with **React Native, NestJS and PostgreSQL** (private repository).
- End-to-end encrypted messaging on the **Signal Protocol** (X3DH, Double Ratchet, Sealed Sender) with multi-device delivery, message search and an MFA-protected encrypted file vault.
- Group voice and video calls (**WebRTC**, mediasoup) for up to 10 participants, with ringing even when the app is closed (CallKit / Android Telecom).
- Executive Protection missions with live GPS tracking, Mapbox navigation and SOS, plus bookings, auto-dispatch, **Stripe** escrow / payouts and a multi-currency wallet.

Fraud Detection System

- Built a machine learning system that flags fraudulent credit card transactions by combining anomaly detection **(Isolation Forest)** with supervised classification **(XGBoost)**.
- Reduced **false positives by 15%** while improving detection accuracy, making transaction monitoring more reliable.
