ARIFUL ISLAM

Software Developer • Odoo ERP & Supply-Chain Analytics • AI/ML & Full-Stack Development

Deggendorf, Germany | +49 176 67221612 | ariful81848@gmail.com | github.com/shanto173 | linkedin.com/in/ariful-islam

PROFESSIONAL SUMMARY

Software developer with a data-science foundation who turns manual business reporting into live, reliable software. At a zipper and metal-trims manufacturer, built **20+** production Odoo dashboards spanning inventory, purchase, sales, manufacturing and accounts, replacing spreadsheet reporting and helping cut material shortages by **40%**. Currently contributes to an end-to-end encrypted messaging and booking platform (React Native, NestJS, PostgreSQL) while pursuing an MSc in Artificial Intelligence and Data Science at Deggendorf Institute of Technology, Germany.

PROFESSIONAL EXPERIENCE

Software Developer | OmniDevX Studio (Remote) *Jun 2026 – Present*

- Building **Bravo Secure**, an end-to-end encrypted messenger on the Signal Protocol (X3DH, Double Ratchet, Sealed Sender) with multi-device delivery, message search and an MFA-protected encrypted file vault — full stack across React Native, NestJS and PostgreSQL.
- Real-time group voice and video calls (WebRTC, mediasoup) scaled from **6 to 10 participants**, with killed-app ringing through CallKit / Android Telecom; Executive Protection missions with live GPS, Mapbox navigation, SOS, Stripe escrow and a multi-currency wallet.
- Fixed **400+** production bugs from device log to root cause to regression test, contributing to a suite of about **1,430 tests** that raised messenger coverage from **51% to 74%**.

Growth & Automation | Exzellent (Cottbus, Germany) *Sep 2026 – Present*

- Work across a language-learning platform that ships to web, Android and iOS from one codebase — React 19 front end, Node API of 26 modules, AI tutoring and speech practice over an LLM and Whisper.

Executive Engineer (Software Developer) | Tex Fasteners (BD) Ltd. / Tex Zippers *Feb 2025 – Present*

- Designed and built **20+ live Odoo 17 dashboards** (Python, OWL/JavaScript, XML, PostgreSQL) across Inventory, Purchase, Sales, Manufacturing and Accounts, giving management same-day visibility of stock, orders, production and receivables.
- Replaced manually compiled Excel / Google Sheets reports with live Odoo boards and automated Python / GitHub Actions pipelines, saving **2+ hours** of manual work every day.
- Built supply-chain planning tools (SO vs RM availability, forecast vs RM demand plan, consumption-driven stock runway, goods-in-transit) and demand planning / ROL models that reduced material shortages by **40%**, all driven by a single RM Item Master shared by every planning board.
- Rebuilt monthly RM ageing history back to **2021** and corrected production-pending and LC-received logic so the invoice tracker and the production board reconcile order by order.
- Awarded **Best Performer – Q3** for operational excellence in supply chain planning and the move from analyst to developer role.

Software Developer | GAOTek Inc. (Remote, New York) *May 2023 – Aug 2023*

- Developed and customised Odoo modules in Python and XML; supported debugging, testing and module configuration. Worked with PostgreSQL, took part in code reviews and wrote technical documentation.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, MATLAB
- **ERP (Odoo 17):** custom modules, ORM, OWL components, QWeb / XML views, scheduled jobs, record rules, Odoo.sh
- **Backend & databases:** NestJS (Node.js), REST APIs, PostgreSQL, MongoDB, MS-SQL
- **Web & mobile:** React, Next.js, React Native, Capacitor
- **Data & BI:** pandas, NumPy, Matplotlib, Power BI, Power Query, Looker Studio, Google Sheets API
- **Machine learning & AI:** TensorFlow, Random Forest, XGBoost, Isolation Forest, LangChain, RAG, MCP, GenAI
- **Real-time & security:** WebRTC, Signal Protocol (E2EE), Stripe, Mapbox
- **Tools:** Git / GitHub, GitHub Actions, Vercel, Docker, Claude Code

FEATURED PROJECTS

- **Bravo Secure** — encrypted booking platform and Slack-style team messenger for security personnel (private repository).
- **Inventory Data Automation** — Python, GitHub Actions and Google APIs pipeline feeding live Looker Studio and Google Sheets reports. github.com/shanto173/inventory_data_automation
- **Health Monitoring System** — Random Forest on wearable-device data predicting heart disease and diabetes; **87%** accuracy. **Fraud Detection System** — Isolation Forest and XGBoost on credit-card transactions; false positives reduced by **15%**.

EDUCATION

MSc, Artificial Intelligence and Data Science | Deggendorf Institute of Technology *Mar 2026 – Mar 2028 (expected)*

BSc, Computer Science and Engineering | Notre Dame University Bangladesh *2020 – 2023*

- CGPA 3.55. Higher Secondary Certificate, Govt. Science College, Dhaka (GPA 4.50); Secondary School Certificate, Motijheel Model School & College (GPA 5.00).

AWARDS & LANGUAGES

- **Best Performer – Q3**, Tex Fasteners (BD) Ltd.
- IELTS 7.0 — British Council
- **Languages:** Bengali (native), English (C1 – B2), German (**A2**)
